

A whole-of-school community approach to road safety

About our approach

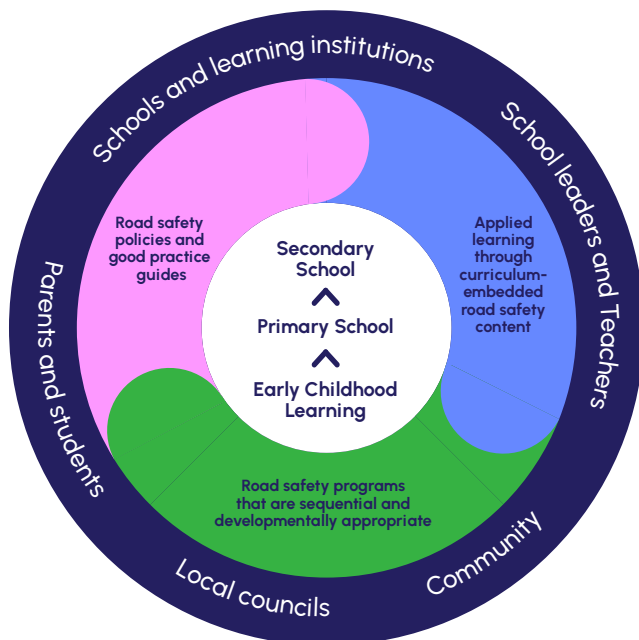

The Victorian Government Road Safety Partners, the Transport Accident Commission, the Department of Transport and Planning and Victoria Police support and implement a whole-of-school community approach to road safety.

Through this approach, we support school communities to embed a culture of road safety and help inform the development of policy and practices within and beyond the school gate.

We believe that road safety is a shared responsibility and that we all have an important role to play in keeping children, young people and the broader school community safe when travelling on and around our roads.

Whole-of-school community approach

Support for school communities

We provide evidence-based programs, resources and support activities spanning all education settings, from Early Childhood to VCE, and all audiences – young and novice drivers, families, local government authorities, and the general community.

Through our dedicated **Road Safety Education Victoria website**, we provide the following free offerings to all Victorian schools:

- road safety programs and resources
- policy templates
- curriculum-linked lesson plans and units of work
- professional development for educators.

For support with road safety education, policy development and resources visit the Road Safety Education Victoria website or email: education@transport.vic.gov.au

A whole-of-school community approach to road safety

Programs and Resources

	Program/Resource	Year Levels	Purpose/Description
Whole School	The Good Practice Policy Guide	All	Assists with embedding a culture of road safety and informs the development of policy and practice.
	Road Safety Education and Safe Travel Action Tracker	All	Identifies road and transport safety gaps and sets goals for improving outcomes for the whole school community.
	Policy template	All	Integrates road safety into broader school policies.
	Professional development for teachers	All	Provides road safety learning across the curriculum.
	Curriculum Scope and Sequence	Prep-Year 12	Supports the integration of road safety across all year levels.
Early Childhood	Starting Out Safely	Newborn-Prep	Guides children's learning in being and becoming safe and independent road users.
